

## Intensive Care Coordination (ICC)

---

### Program Overview

Youth with complex behavioral health needs are at risk for inpatient care and other placements separating them from their homes and communities. ICC addresses these challenges with intensive care coordination and the wraparound practice model. Families do not need to have Medicaid coverage or be DCF-involved to receive Beacon's ICC services

### ICC is available to:

Families with children up to age 18 who have complex behavioral and/or mental health challenges. This includes youth who are:

- In group home or residential care settings in need of discharge planning support
- At risk of out of home placement
- Frequently in need of emergency services and psychiatric inpatient care
- In need of ongoing care to remain in their homes and communities

### Length of Service

The ICC Program supports families for approximately six months, based upon the family's needs.

### Program Coverage and Providers

This program is available statewide through [Beacon Health Options](#) – 860-707-1052
