

Care Coordination

Program Overview

[Care coordination](#) services are provided to children and youth who have complex behavioral health needs and require an intensive coordination of multiple services to meet those needs.

Target Population

Children and youth through age 18 (or still attending school):

- Who require coordination of multiple services/supports to meet the needs of the child/youth and their family
- Youth with serious mental/behavioral health challenges
- Who are at risk to be, or have already been, separated from their family and/or community (i.e. residential or hospital level care) for the primary purpose of receiving behavioral health or mental health related services

Length of Service

The length of service for each child and family is generally up to 6 months. If the Child and Family Team identifies the need for additional time through the Care Planning process, an extension request may be submitted.
